

Do not repeal or ammend the phone privacy act! The American people have suffered a loss of many hours of productive time due to wasted time on the telephone with telemarketers. They call at all hours, day and evening! The people have had a rest from this barrage for a short time now and it has been very useful to myself. I've had many hours that I have spent quality time with my family without interruption from telemarketers! Again, DO NOT REPEAL OR AMEND the phone privacy act!
